

# WEBINAR | Energy Recovery Hydropower

## Energy recovery hydropower utilizes existing, pressurized pipelines to generate electricity

**What:** The Colorado Energy Office is presenting a **free** introductory webinar on energy recovery hydropower. It is the most economically-feasible type of new hydropower development, taking advantage of significant recent changes in federal and state policy.

**Why:** The purpose of this free webinar is to provide an overview of Colorado resources available to help support hydropower project development, including free site assessments, grants to support project feasibility and engineering, and low-interest loans which can provide 100% of project construction costs. The webinar will also highlight recently completed projects.

**When:** April 19 from 11 a.m. to 12 p.m., MT.

**Who:** Colorado water agencies, municipal staff, utilities, and interested stakeholders.

**Registration:** Please email Samantha Reifer, [sammy.reifer@state.co.us](mailto:sammy.reifer@state.co.us), 303-866-2418.

**Attend this webinar to learn why there has never been a better time to develop new small hydropower in Colorado.**
