

National Stormwater Center Presents:

CERTIFIED STORMWATER INSPECTOR - MS4

Designed for MS4 personnel, this class focuses on MS4 permit regulations and compliance to restore and maintain the waters of the United States. Permits require certifying officials select *qualified* stormwater personnel. Gain an in-depth understanding of stormwater permits, the six minimum control measures, how to conduct inspections, and the authority, demeanor, and discretion of stormwater inspectors to enhance your credentials of *qualified*.

This class is appropriate for Municipal personnel:

- Public Works
- Building Code
- Code Enforcement
- Consultants to MS4s
- FOG (Fats, Oils, Grease) inspectors
- Floodplain and watershed personnel

Agenda	Day One 8:30-4:30 CST	Day Two 8:30-4:30 CST
Morning Session	Regulatory review (Clean Water Act, NPDES). Open discussion of MS4, Industrial, Construction Permits.	Illicit Discharge Detection & Elimination, Pollution Prevention, Public Education & Participation
Afternoon Session	Management of Construction Runoff and Post Construction Runoff Controls, Construction Inspections	Inspections including Commercial and Industrial Activities. Testing and Graduation.

Instructor:

Jeff Hutton retired from Illinois EPA having served as a specialist who reviewed permits issued by the Bureau of Water and NPDES permits. He also dealt with issues regarding land applications of sludge containing technically enhanced radiation. Additionally, Jeff supported Federal and State construction grants for water and sewer facilities.

Testing and Certificates:

Students are expected to achieve minimum score of 75% to be awarded 1.4 Continuing Education Units and a five (5) year CSI™ Inspector Certificate.

The certification indicates the services are being performed by professionals who have completed stormwater inspector certification requirements and have met established standards of knowledge, experience, and competence required in the field of stormwater inspections.
